

BILLMONT MASTER WRENCH

"The Wrench that Spins'em off"

A universal socket wrench driving through a stationary member with a coarsely knurled hand grip. Inner or driving member with its curved revolving nose is propelled by sliding T bar handle at top that can be adjusted backward or forward to allow complete turn on nut without removing wrench.

If you think you've known good wrenches, wrenches that would do the trick of spinning off the "hard ones"

easily and without skinned knuckles you have yet to learn about the Billmont Master Wrench. Its curved revolving nose goes anywhere—everywhere. Slips into the most inaccessible spots on body or motor, grabs hold, and sticks until—off she comes.

Billmont has more capacity for work than any tool you've ever owned. Even spins off Ford 4th connecting rod nut. Plenty of leverage on handle—no chance for hand to slip from knurled hand-grip. The handiest tool of many accomplishments ever devised.

A popular set consists of wrench, 5 hexagon sockets (7-16, 1-2, 9-16, 19-32, 5-8) and 1 adapter so any standard socket may be used. Adapter also removes oil plugs in many fly wheel and differential cases. In wooden case.

No. 1 Set

\$10.00

All sockets finely machined, broached and hardened.

Billmont Socket Set in hardwood case, sockets only—24 sizes. Every owner of Master Wrench should have this set.
No. 300 Set, Price.....\$11.80

No. 350. Complete with Cabinet

\$80.00

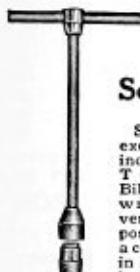

BILLMONT Junior Wrench

A big husky wrench 11½ inches long of great strength and capacity. Nickel and Parker rust-proof finish.

Similar to Master Wrench excepting nose is straight instead of curved. Sliding T bar handle permits tremendous pressure and complete turn on nut with great speed. Nickelized hand-grip at center gives firm hold while operator revolves inner tube and nose with T bar handle thereby spinning off nut.

Socket nose is so constructed to take 24 sizes in Billmont sockets — giving complete size range with only one wrench. Patent spring lock holds socket in place.

No. 2 \$3.00

BILLMONT Long T Socket Holder

Similar in every detail except size (which is 12 inches long) to the short T socket holder. The Billmont principle of few wrenches and a universal nose piece makes possible the carrying of a complete range of tools in a small kit — eliminating necessity of many wrenches each of a different size. This line and one set of sockets completes any man's outfit and takes up very little space.

No. 4 90c

BILLMONT Short T Socket Holder

Like other Billmont socket holders, nose is made to take 24 sizes of Billmont sockets, giving varied range of jobs without need of more than 1 wrench. Short T and 24 sockets really make 24 complete wrenches. The solid bar handle equalizes strain put on wrench giving unusual strength for this type.

Nickel and Parker rust proof finish Size 6 inches long.

THE SPECIAL LINE FOR CAR OWNERS

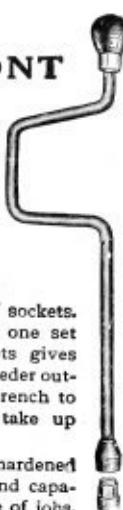

MANUFACTURED BY
Edgar C. Gauthard Co.
CHICAGO

BILLMONT Speeder Socket Holder

An unusually popular speeder because following the Billmont principle, nose piece takes all Billmont sizes (24 in all) of sockets. This speeder and one set of Billmont sockets gives you a complete speeder outfit with only one wrench to carry around or take up space.

Constructed of hardened steel, Parkerized and capable of a wide range of jobs.

No. 7 \$1.25

BILLMONT Rim Brace Socket Holder

Not only adaptable for rim work but popular with car owners and repairmen, because nose piece takes 24 sizes in Billmont sockets, creating a wrench of many uses and great service. Finished in nickel and Parker rust-proof.

No. 6 \$1.50

BILLMONT Offset Socket Holder

Handle designed with upward bend gives unusual clearance permitting better operation and avoiding skinned knuckles. As in other Billmonts universal nose takes 24 sizes in Billmont sockets.

No. 5 70c

No. 8 Ratchet Wrench, 9 In. \$2.00

TWENTY-FOUR Wrenches in ONE

The Billmont universal nose piece used on all socket holders takes 24 sizes, permitting all socket holders to be used with one set of sockets.
